Informatics Engineering graduate and passionate Software Engineer with hands-on experience in full-stack web development and network engineering. Proficient in building robust applications, alongside a proven track record in designing data-driven forecasting systems. During my networking internship, I gained practical expertise in designing and simulating enterprise network architectures, specifically implementing VLAN configurations for IP Camera systems. Leveraging a background in IT sales consulting, I combine a deep understanding of hardware requirements with a strong passion for developing scalable software and modern IT infrastructure.
